

LONDON'S
CREATIVETECH
CATALOGUE

BROUGHT TO YOU BY

Tech London Advocates is a private sector led coalition of over 4,000 expert individuals from the tech sector and broader community who have committed to championing London's potential as a world-class hub for tech and digital businesses.

It strives to support London's tech start-ups and high-growth businesses in finding new investment, new talent and continued success.

The group consists of technology entrepreneurs, established digital giants, journalists, government figures and vital suppliers to our industry. The group also has Overseas Advocates from 50 countries and territories across the world.

The Creative Industries Federation is the national membership organisation bringing together all of the UK's creative industries, cultural education and arts to provide an authoritative and united voice in a way never done before.

Our extraordinary sector is the fastest growing part of the UK economy. It feeds and fascinates hearts and minds and is the UK's calling card to the world. But it has never quite punched its weight in government - until now. The Federation was the brainchild of Sir John Sorrell, the designer and UK business ambassador, and a heavyweight team of creative leaders including Sir Nicholas

Serota, Sir Peter Bazalgette, Amanda Nevill of the British Film Institute and Caroline Rush of the British Fashion Council. We have a board of top figures and an equally dynamic UK council of members ranging from multinationals to young entrepreneurs.

We have now gone global with an international council too. We are entirely independent, with our revenues - and our strength - coming from our incredible array of 1,000+ members from architecture to video games, publishing to performance, creative tech to craft and design, as well as universities, colleges and conservatoires, across all the UK's nations and regions.

INTRODUCTION

**RUSS SHAW, FOUNDER
TECH LONDON ADVOCATES &
GLOBAL TECH ADVOCATES**

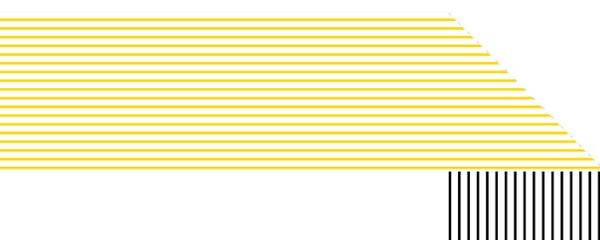

“London is at the epicentre of another development – the CreativeTech revolution”

Over the last five years, London has reinvented itself as a global technology hub. In that time, we have seen the creation of a number of new tech verticals alongside the development of existing ones. London has established itself as the tech capital of Europe – with clusters of advanced firms growing as a result of a robust investment infrastructure and a series of well-developed support networks.

Now, London is at the epicentre of another development – the CreativeTech revolution. New businesses in established creative sectors are using technology to disrupt the status quo. From fashion to gaming, advertising to design, creative industries throughout the UK have been transformed through the implementation of new and exciting technologies. London is building a mature CreativeTech ecosystem by co-opting existing legacy strengths, using the UK’s well-established creative sector to build a new tech vertical with digital and innovation at its core.

CreativeTech businesses can help London cement its position as an international tech city, helping to drive growth in the digital sector as businesses look to use technology in an increasingly innovative way. As we look to secure London’s future, the CreativeTech revolution can be a resource for new ideas, playing a crucial role in driving growth in the city’s tech and digital sector.

THE CREATIVE 50

London is one of the truly global tech cities, with a large number of self-contained verticals that make up the wider tech ecosystem.

Like the Fintech industry, London's CreativeTech sector is the one of the most advanced in the world. CreativeTech companies are using new technologies to rewrite the rules in their respective fields.

The following companies represent the scale and diversity of the UK's CreativeTech sub-sector, each using technology to craft, create or design.

TLA CreativeTech is a unique group within Tech London Advocates that brings together creative tech start-ups, service providers, brands and industry institutions to help make London the place for all things CreativeTech. TLA CreativeTech aims to make a difference by providing start-ups, investors and agencies with the opportunities to achieve their business objectives.

**MARC DUKE, COMMUNITY MANAGER,
TLA CREATIVETECH**

There are important tech clusters evolving in locations across the UK. Combining top-level creatives from sectors such as music, performance and fashion with an innovative and skilled tech community offers unparalleled opportunities for the development of CreativeTech. The Creative Industries Federation is working with government to secure the policies and infrastructure needed to support growth in this hugely exciting area.

**JOHN KAMPFNER, CHIEF EXECUTIVE,
CREATIVE INDUSTRIES FEDERATION**

There's no better place than London to scale a business. You can walk from the banking centre to Tech City just a few feet away, then zip across to 10 Downing Street or over the river to City Hall. On top of this incredible accessibility, the city's 150+ co-working spaces, 66 accelerators & incubators, and world-class universities make London a brilliant place to hire and develop incredible talent.

SARAH WOOD, FOUNDER & CEO, UNRULY

London is a dynamic location because of its ability to combine technology with innovation. The future of London lies in engaging native talent from our diverse communities where a generation of Gen Y & Gen Z digital natives are neighbours to an industry which has yet to connect with them. Engaging this talent is vital in future-proofing both London and its CreativeTech industry.

**RIOCH EDWARDS BROWN, FOUNDER,
SO YOU WANNA BE IN TECH?**

London is already considered one of the creative capitals of the world - and with our growing reputation for tech we have the opportunity to build a world class CreativeTech hub too. We have a unique combination of tech and creative skills which places us at the centre of innovative technologies such as VR, AR and AI. Because of this, the largest agencies, the biggest brands and some of the world's leading tech companies are all choosing London.

**ROSE LEWIS, CO-FOUNDER,
COLLIDER ACCELERATOR**
